

Audio Recordings - Lecture Series'  
July 1969 - July 1973  
ECOhealth

This ECOhealth audio tape lecture series is a sequential library of talks on the workings of consciousness.

The series is arranged so as to provide an orderly unfoldment of consciousness through diligent application of the principles disclosed.

Through a synthesis of the physical life and social sciences, the spiritual nature of human beings is revealed.

Orderly development of this inner nature is certainly the single most valuable activity of those who have the potential to do so.

This tape series is a most effective means of achieving that goal.

The 82 general series (G.S.) tapes were recorded either in Marin County, Berkeley, San Carlos, San Francisco, Modesto, Long Beach, Portland or New York.

All materials on tapes listed are copyright 2005, ECOhealth (previously Domain) and may not be copied, played on the air or published in transcribed form without written permission.

The original library was recorded by Harbinger Recordings on reel-to-reel tapes. These recordings were edited and transferred to CD's from 2004 - 2005.

Recordings are generally 60 - 90 minutes in total or 60 minutes per part I and part II. In some cases, sections where original recording was very poor or where material is of a personal nature unrelated to the content of the lecture have been omitted.

There are some transcriptions produced between 1967 and 1980 that are available. A complete set of transcriptions of this lecture series is in process.

There are also many audio-cassette tape recordings and transcriptions of lectures given by the same speaker from 1986 - 1995.

Please see the separate listing for this series.

A complete set of transcriptions of this lecture series is in process.

Production of the original lectures is still in process.
